Buckminster Fuller: yielding the greatest possible efficiency in terms of the available technology, 'doing the most with the least'. Hence ***dymaxion car***, ***house***, ***map***, etc.

In a private communication (July 1969) Mr. Buckminster Fuller said that the word was coined for him in 1929 by his business associates as a 'word-portrait' of him and his work. They were concerned to form a euphonious word of four syllables based on words that occurred in Fuller's own description of his prototype (*Dymaxion*) house, viz. *dy*(*namism*, *max*(*imum*, and *ion*.

dyna-. In the derivatives of Gr. δύνα-σθαι to be able, δύναμις power, *y* (= Gr. υ) is etymologically short, and is so treated in pronouncing dictionaries down to the middle of the 19th c. But popular usage (esp. since *dynamite* came into vogue) tends to give the *y* the diphthongal pronunciation (aɪ) in all these words, though (dɪn-) is still preferred by some in *dynamic* and its family, and app. by most scholars in *dynasty* and its family.

dynamics (daɪ-, dɪ'næmɪks). [Plural of DYNAMIC, after earlier names of sciences in -ICS, q.v.]

1. a. The branch of Physics which treats of the action of Force: in earlier use restricted to the action of force in producing or varying motion, and thus opposed to *Statics* (which treats of rest or equilibrium under the action of forces); more recently (see quots. 1863–67), the name *Kinetics* has been introduced for the former, Dynamics being taken in a more comprehensive (and more etymological) sense, to include Statics and Kinetics. But the earlier usage, in which Statics and Dynamics are treated as co-ordinate, is still retained by some physicists, and has largely influenced the popular and transferred applications of the word and its derivatives. Also called DYNAMIC.

1788–89 HOWARD *Royal Encycl., Dynamics* is the science of moving powers; more particularly of the motion of bodies that mutually act on one another. **1804** ROBISON *Mechan. Philos.* Pref. 2 Keeping in view the proprieties of language, and following the example of the most logical writers, we employ the term Dynamics in its true sense as the science which treats of the action of *force*, whether it maintains relative rest, or produces acceleration of relative motion. The two corresponding divisions of Dynamics are thus conveniently entitled *Statics* and *Kinetics*. **1871** TYNDALL *Fragm. Sc.* (1879) I. i. 17 We deal with statics, not with dynamics.

b. That branch of any science in which force or forces are considered.

e.g. ***geological dynamics***, that branch of geology which treats of the nature and operation of the forces by which the earth's surface has been affected, as distinguished from that which treats of the existing condition of the surface, and the order and characteristics of the strata.

dynamism ('daɪn-, 'dɪnəmɪz(ə)m). [f. Gr. δύναμις power, force + -ISM. In mod.F. *dynamisme*.]

1. A philosophical system, theory, or doctrine, which seeks to explain the phenomena of the universe by some immanent force or energy.

Applied to an ancient doctrine of the Ionic philosophers, who explained the motion of bodies by such principles as love and hatred; to the doctrine of Leibnitz that all substance involves force; and to modern theories that mechanical energy is substance, or that the doctrine of energy is sufficient to explain the constitution of the universe.

Cf. also DYNAMO-METAMORPHISM.

dynamo ('daɪnəməʊ), *sb.* Pl. -os. [Abbreviated from *dynamo-machine*, itself short for *dynamo-electric machine.*] **a.** *Electr.* A machine for converting energy in the form of mechanical power into energy in the form of electric currents, by the operation of setting conductors (usually in the form of coils of copper wire) to rotate in a magnetic field.
The full name ***dynamo-electric machine*** was given by Siemens in 1867, to distinguish his invention from the ***magneto-electric machines*** previously used, in which the electric current was generated by means of a permanent magnet. But in the shortened form *dynamo* (recommended by Prof. S. P. Thompson early in 1882), the use of the word has been extended so as to include all forms of these machines: see quot. 1884.
[**1882** *Times* 2 Dec. 5 Professor Thompson said that the name 'dynamo-electric machine' was first applied by Dr. Werner Siemens in a communication made in January, 1867, to the Berlin Academy. He there described a machine for generating electric currents by the application of mechanical power, the currents being induced in the coils of a rotating armature by the action of electro-magnets which were themselves excited by the currents so generated. The machine was, in fact, a self-exciting dynamo.]

dyne (daɪn). *Physics.* [a. F. *dyne*, taken from Gr. δύναμις force, δύνασθαι to be powerful.]

The unit of force in the centimetre-gramme-second (C.G.S.) system, i.e. a unit equivalent to that force which, acting for one second on a mass of one gramme, gives it a velocity of one centimetre per second.

In France the term had been proposed at an earlier date in a different sense: see quot. 1842.

[**1842** *Mech. Mag.* XXXVI. 192 The Industrial Society of Mulhausen..observe, that the usual estimation of horse-power is not uniform, and propose that the unit for France should be the force required to raise one kilogramme to the height of a metre in a second. To this unit they propose that the name of *dyne*..should be applied.] **1873** *Brit. Assoc. Rep.* 223 As regards the name to be given the C.G.S. unit of force, we recommend that it be a derivative of the Greek δύναμις. The form *dynamy* appears to be most satisfactory to etymologists. *Dynam* is equally intelligible, but awkward in sound to English ears. The shorter form, *dyne*..will probably be generally preferred in this country. *Ibid.* 224 The weight of a gramme, at any part of the earth's surface, is about 980 dynes, or rather less than a kilodyne. **1874** Maxwell *Poem* in *Life* (1882) 633 This string, you said, is strained too far, 'Tis forty dynes at least too tight. **1889** A. W. Poyser *Magnet. & Electr.* 97 By a charge of one unit is meant that charge on a very small body, which, if placed at a distance of one centimetre from an equal and similar charge, repels it with a force of one dyne.

-dyne (daɪn), *suffix*, forming sbs. repr. Gr. δύναμις power, used in the formation of scientific, esp. electrical, terms. Examples: *aerodyne*, *amplidyne*, *autodyne*, *heterodyne*.

dynein ('daɪni:n). *Biochem.* [f. dyne + -in^{1}, -ein (see quot. 1965).] A protein with ATPase activity that is responsible for the movement of cilia, flagella, and sperm tails; **dynein arm**, a short transverse projection from a ciliary microtubule, composed of dynein.

1965 Gibbons & Rowe in *Science* 23 July 424/2 We propose the term 'dynein' (*dyne*, force; *-in*, protein) to describe..adenosine triphosphatase proteins associated with motile structures. **1974** *Sci. Amer.* Oct. 50/2 If the ciliary microtubules could 'walk along' one another by means of their dynein arms, one could envisage that, given the right sequence of activity and appropriate shear resistance with the axoneme, bends would form. **1979** *Nature* 7 June 532/1 The force required for motion of cilia, eukaryotic flagella and sperm tails is generated by the dynein arms... The dynein arms have been shown to contain Mg^{2+}-ATPases. **1985** *Sci. Amer.* Oct. 99/1 In cilia and flagella tubulin links with a flexible protein known as dynein.

E

E (i:), the fifth letter of the Roman alphabet, represents historically the Semitic ∃, which originally expressed a sound resembling that of *h*, but was adopted by the Greeks (and from them by the Romans) as a vowel, the pronunc. of which probably varied from the 'mid-front' (e) to the 'low front' (ɛ) vowels of Bell's system. In the Roman, as in the earliest Greek alphabet, the letter represented the long as well as the short quantity of the vowel. There are reasons for believing that in OE. the short *e* had two sounds, possibly (e) and (ɛ); the OE. long *é* seems to have been sounded approximately as (e:).

The sounds now expressed by E in standard English are the following:

(1) (i:) in *be* (bi:)
(2) (ɪə) in *here* (hɪə(r))
(3) (ɛə) in *there* (ðɛə(r))
(4) (i:/ɪ)in *acme* ('ækmi:, 'ækmɪ)
(5) (ɛ) in *bed* (bɛd)
(6) (ɜ:) in *alert* (ə'lɜ:t)

Exceptional sounds are (7) (eɪ) in *eh!*, (8) (ɪ) in *E*ngland, *E*nglish, and (9) (o:) occurring before *r* in *clerk*, *sergeant*, and in various proper names, as *Berkeley*, *Hertford*.

In unaccented syllables it has the obscure sounds:

(10)(ɪ) in *remain* (rɪ'mein), *added* ('ædɪd)
(11)(ə) in *moment* ('məʊmənt), *father* ('fo:ðə(r))
(12)the mere voice-glide (ə) as in *sadden* ('sæd(ə)n).

In foreign words not fully naturalized certain other sounds occur: the Fr. *en* occas. retains in Eng. use its two sounds of (ɔ̃) and (æ̃), as in *ennui* (ɔ̃nyi), *bon-chretien* (bɔ̃kretjæ̃); the Fr. unaccented *e* preserves the sound of (ə) in words like *eau-de-vie* (o də vi); and the Fr. *é* that of (e) in a few words, as *café* (kafe).

E is also the first element in many vowel-digraphs, most of which have more than one pronunciation.

(1) *Ea* is usually sounded (i:), as in *bead* (bi:d); exceptionally as (eɪ) in *break*, *great*, *steak*. It frequently represents (ɛ) in cases where that sound descends from a long vowel or diphthong, either original, as in *thread* (θrɛd), *dead* (dɛd), or acquired in ME. through position, as in *stead* (stɛd). When followed by *r* it has the sounds of (ɪə) as in *ear* (ɪə(r)), of (ɛə) as in *pear* (pɛə(r)), and of (ɜ:) as in *earth* (ɜ:θ), (o:) as in *heart* (ho:t). In final unaccented syllables it sometimes becomes (ɪ) as in *guinea* ('gɪnɪ).

(2) *Eau*, found only in words of Fr. origin, is sounded (ju:) in *beauty* and its derivatives, and (i:) in a few proper names, as *Beauchamp* ('bi:tʃəm); in all other cases it is (əʊ) or (o), as in *bureau* ('bju:rəu), *rouleau* (rulo).

(3) *Ee* has the sound of (i:) as in *feel* (fi:l), and before *r* that of (ɪə), as in *peer* (pɪə(r)). In *been* many persons sound it as (ɪ); it has also this sound in *breeches* ('brɪtʃɪz), *coffee* ('kofi).

(4) *Ei* has the sound of (i:) chiefly in the combination *cei*, as in *receive*; also in *teil*, and in Sc. words, as *teind*. In other cases its usual sound is (eɪ), as in *vein*. In *either*, *neither*, it is variously sounded (i:) and (aɪ). In a few words, on account of German or Greek etymology, it is pronounced (aɪ), as in *eider-down*, *ophicleide*. In unaccented final syllables it becomes (ɪ), as in *foreign* ('forɪn), *sovereign*.

(5) *Eo* (as a digraph) is sounded (i:) in *people*, (ɛ) in *leopard*, and (əʊ) in *yeoman*.

(6) *Eu* has the sound of (ju:), and when followed by *r* that of (jʊə), as in *euphony*, *Europe*. (After *l* or *r* the first element in these diphthongs is wholly or partially obscured: see L, R.) In a few Fr. words not fully naturalized *eu* retains its original sounds (œ) and (ø).

(7) *Ew* has the sound of (ju:), as in *new* (nju:), *Matthew*.

(8) *Ey* is sounded (i:) in *key*, and (eɪ) in *obey*, *they*, *prey*; it occurs most frequently in unaccented final syllables, with the sound (ɪ), as in *donkey* ('doŋkɪ), *money*. In *eye* and its derivatives and compounds it is pronounced (aɪ).

The cases in which E is silent are very numerous.

The rule may be laid down that (except in foreign words not fully naturalized as to form) a final *e* is never sounded when there is another vowel in the word. The silent *e* is due primarily to the ME. obscure *-e* (:—OE. *a*, *e*, *o*, *u*, or a. Fr. *e*), which continued to be written long after it ceased to be sounded. In imitation of the cases in which the silent *e* had this historical justification, it was in 16th c. very frequently added to almost all words ending phonetically with a cons.; when the preceding vowel was short and accented, the final cons. was doubled, as in *bludde*, *bedde* for *blood*, *bed*; a mute *e* after a single cons. implied that the preceding vowel was long. In our present spelling the use of silent *e* has been greatly narrowed, but it is retained in the following cases: (1) When it serves to indicate that the vowel in the syllable is long; e.g. in *wine* (waɪn) compared with *win* (wɪn), *paste* (peɪst) compared with *past* (po:st, pæst). When the quantity of the vowel is already shown by the use of a digraph, the *e* is no longer added, e.g. in *soon*, *mean* (in 16th c. often *soone*, *meane*), unless the final cons. is *s*, *z*, or the voiced *th* (ð), as in *house*, *breeze*, *sheathe*. (2) When a word ends phonetically with certain consonants which custom does not permit to be written in a final position, as *v*, and *l*, *r* after consonants. (3) Where the silent *e* affects the pronunc. of a preceding *c* or *g*. (4) After *s* or *z* preceded by a cons., as in *purse*, *pulse*, *corpse*, *bronze*, *furze*. (5) In words like *infinite*, *rapine*, etc., where the vowel of the final syllable has become short since the establishment of the existing rules of spelling; and in words adopted from Fr. (6) In some anomalous cases of diverse origin, as *are*, *were*, *come*, *done*, *gone*, *some*, *one*, *none*. The silent *e* is omitted before flexional suffixes beginning with a vowel, as in *moving*; before *-able* it has been usually retained, as in *moveable*, *loveable*, *unmistakeable*, though many writers now prefer to omit it, esp. when the vb. is a polysyllable. Before suffixes beginning with a cons. the mute *e* is nearly always written; in *abridgment*, *acknowledgment*, *fledgling*, *judgment*, *nursling*, it is commonly omitted, but usage is divided except in the last instance; in this Dictionary the *e* is retained after *dg*, in accordance with general English analogies.

[The historical forms inseparable from this word represent three distinct but nearly synonymous words in OE.

1. OE. *ælc*, app. = OFris. *ellîk*, *elk*, *êk*, Du. *elk*, OHG. *eogilîh* (MHG. *iegelîh*, mod.G. *jeglich*):—WGer. phrase **aiwo*(*n galîko-z*, corresp. to OE. *á ȝelíc* (see A *adv.*, AY, and ALIKE). The phrase may perhaps best be explained as evolved from the adverbial **aiwo*(*n galîkô* 'ever alike', = the frequent OHG. *eogilîcho*. In OE. (as in OFris. and Du.) the second word seems to have lost the prefix *ȝe-*, and the *i* of **á-líc*, **álic*, produced the umlaut in the first syllable. (See, however, 3 below.) The OE. *ælc* with long vowel is perhaps the ancestor of our modern form; but already in the OE. period the vowel was dialectally shortened, and appears as *ælc*, *elc*, and *ylc*. The two former gave rise to such ME. forms as *alc*(*h*, *ache*, *elch*; the OE. *ylc* seems to be recorded only in the (Mercian) Vesp. Psalter, but must have been widely diffused, as it became in southern ME. *ulch* (*ü*), *ilch*, in west midland *uch* (*ü*), *ich*, and in east midland and north. ILK, which still survives in north. dial. and in Sc. (In *Havelok* the form *ilc*, *ilk* is occas. reduced to *il* before a cons.)

2. OE. *ȝehwilc* = OHG. *gihwelîh* (see Y- and WHICH). This is the source of early ME. *iwilch*, *iwulch*, probably also of *uwilch*, *uich*; it is possible also that the 14–15th c. *uch*(*e* may be from this source instead of being a continuation of the earlier *uch* (*ü*) from OE. *ylc*. (Layamon writes *iwildel*, *iwidel* for *iwilc del*; similarly the Lambeth Homilies have *uwil* before cons., and accus. *uwilne*.)

3. OE. *ǽȝ-* (*ǽȝ-*, *éȝ-*)*hwilc* = OHG. *eogihwelîh*, f. WGer. **aiwo*(*n*, OE. *á*, *ó*, AY, always + **gahwalîko-z* = OE. *ȝehwilc* (see above). (The umlaut is supposed to be due to the *i* in *ȝi-*, earlier form of the prefix *ȝe-*.) This word seems to be represented in ME. by the forms *ewilc* (*eulne* for **eulcne* accus. occurs once in Layamon), *euych*, *eilc*, *ewc*, *euch*; the forms *eich*, *eyche*, in 15–16th c. may possibly in some cases belong to this series rather than to *a*, to which they are referred above.]

B. Signification and uses.

I. As adj. used *attrib.*

1. Every (individual of a number) regarded or treated separately.

The early use of *each* corresponded closely to the mod. use of its compound EVERY (= *ever each*), the only difference being that it has always been possible to use *each* when only two things are referred to. Thus a sentence with a sing. subject preceded by *each* would (formerly) have been but slightly if at all altered in meaning by the substitution of a plural subject preceded by *all*. In modern usage *each* has assumed the sense of the Lat. *quisque*, and implies a distribution of the predicate or object parallel with the distribution of the subject (or conversely). An exception to this rule results from the fact that we cannot use *every* when only two persons or things are spoken of, so that in this case *each* retains its original extended use.

Mod. They cost sixpence eaeh. I paid sixpence each for them.

5. *each other*: used as a reciprocal pronoun in acc., dat., or genit. case; = *one another*.

Originally tbis was a phrase construed as in 4, *each* being the subject, and *other* (inflected in OE. *óðerne, óðres, óðrum*, etc.) being governed in acc., genit., or dat. by a verb, prep., or sb. This use still oecurs arcb. or poet. (*each to other*, etc.). The words have however long become a compound (cf. Du. *elkander*), so that we can say *to each other, of each other*, etc. To use the word as a nom. ('We know what each other are doing') is a vulgarism occasionally heard.

1. a. The name commonly given to any of the larger Diurnal Birds-of-prey which are not Vultures; though some birds are accounted Eagles by ornithologists which are smaller than certain Buzzards. Two species of Eagle are natives of Britain; the Golden Eagle (*Aquila chrysaëtus*), almost confined in these islands to the mountainous parts of Scotland and Ireland; and the Sea, or White-tailed Eagle (*Haliaëtus albicilla*) found on the coasts of the same countries. Much resembling the latter is the Bald or White-headed Eagle (*H. leucocephalus*), the emblematic bird of the United States of America. Freq. in U.S. allusive use, esp. as a symbol of liberty or freedom.

The strength, keen vision, graceful and powerful flight of the eagle are proverbial, and have given to him the title of the king of birds.

b. *spec.* In England, Scotland, and Ireland, the title of a specific order of rank, corresponding to *Count* in the nobility of other European nations; in the modern peerage an earl ranks next below a marquis, and next above a viscount.

Under the Norman kings the title of earl (count) implied the governorship or the feudal lordship of a COUNTY; subsequently the territorial designation (Earl of Derby, of Leicester) became, as in other degrees of the peerage, purely formal, and in some cases a surname is used instead (as Earl Brownlow, Earl Cowper). When a duke or a marquis has an earldom as his second title, this is 'by courtesy' given to his eldest son: thus the heir of the Duke of Northumberland is Earl Percy, of the Marquis of Winchester, the Earl of Wiltshire.

'Earl 'Marshal. A high officer of state, formerly the deputy of the CONSTABLE as judge of the *curia militaris* or court of chivalry. The title was originally 'marshal', but one of the holders of the dignity became in 1189 Earl of Pembroke, and it has never since been held by a person of lower rank than an earl. The office is now hereditary in the line of the Dukes of Norfolk, its functions being now confined to the presidency of the Heralds' College and the right of appointing its officers, and to certain purely ceremonial duties.

The equivalent Scottish office of *marischal* became in 14th c. hereditary in the family of Keith; in 1458 the holder of the office was created an earl under the title of Earl Marischal; the last Earl Marischal was attainted in 1716.

A. *adj.* **I.** Absolutely or relatively near to the beginning of a portion of time: opposed to *late.*

When used with a sb. denoting a division of time, it sometimes gives to the latter a partitive sense: thus *the early spring* = the early part of the spring; *the early morning* = the early part of the morning; similarly *the early nineteenth century*, etc.

1. With reference to the time of day.

a. Belonging to the first part of the morning; that exists, takes place, appears, or does something in the first part of the morning. Proverb, ***The early bird gets the worm***; hence ***early bird***, humorously = early riser.

In *early riser, early rising*, the first word may either be taken as an adj., or the phrase may be treated as a combination in which the first element is the adv. (cf. *well-doer, -doing*). The former view seems most in accordance with the modern grammatical consciousness, and is supported by the analogy of the similar phrase in quot. 1225.

b. Relatively near to the beginning of the day (or night). Of events or actions: Taking place at an hour relatively not far advanced, or before the usual hour. ***small-and-early***: applied in the 19th c. to evening parties; colloq. also as quasi-*sb.*

c. ***to keep early hours***: to rise and retire early. ***early habits***: habits of keeping early hours. Hence colloq. the adj. is applied to persons.

earnest ('ɜ:nɪst), *sb.*[2] Forms: 3 dat. or acc. ernesse, 4 ernes, eernes, 5 ernys, 5–6 ernest, (5 arneste), 6– earnest. [Of obscure etymology: presumably connected with the synonymous *erles* (see ARLES), ERRES (a. OFr. *erres* pl.); possibly it was altered from these after the analogy of derivatives in -NESS.

The alleged OF. *ernes*, frequently given as the etymon, is spurious (Prof. Paul Meyer); the Welsh *ernes* is borrowed from Eng. At an early period app. confused with EARNEST *sb.*[1], the notion being that an 'earnest' was so called as showing that a bargain was made 'in earnest'.]

The lit. sense is now nearly confined to law-books, and the fig. use, which retains its currency chiefly on account of its occurrence in the Bible, has almost ceased to be consciously metaphorical.

With the northern and Sc. forms with *-d* cf. ME. *dede* for *death*; the change of *-þ* into *-d* is rare at the end of a word, though in medial positions it is frequent in Sc. The northern forms of the present word were in the early ME. period graphically coincident with those of erd, and in some phrases the two words seem to have been confused.]

(Men's notions of the shape and position of the earth have so greatly changed since Old Teutonic times, while the language of the older notions has long outlived them, that it is very difficult to arrange the senses and applications of the word in any historical order. The following arrangement does not pretend to follow the development of ideas.)

Paris *moneta esterlingorum* seems to mean 'the coinage of sterling pennies', not 'the coin of the easterlings'; nor do AF. phrases like 'vint soutz desterlings', 'cinkaunte mars desterlings' show that *esterlings* was understood to be the name of a people. The antiquaries of the 16th and 17th c., however, assumed that the 'esterling' was so called as having been coined by the Easterlings or Hanse merchants; hence they use *easterling money* as a transl. of *moneta esterlingorum*, etc. See STERLING.]

eath, eith (i:ð, i:θ), *a.* and *adv. Obs.* exc. *Sc.* Forms: 1–3 eaðe, eð(e, 1–4 eþe, 3–6 eth(e, 3 æþ, eið, eitht, ith, ieþe, yþe, 4–5 eyth, (4 eeþ, eeth, e3athe), 6 eathe, 6– eath, *Sc.* eith. [OE. *éape* adv. = OS. *ôðo* easily, perhaps, OHG. *ôdo* perhaps (also in *un-ôdo* 'with difficulty'):—OTeut. **aupô*; the combining form *éaþ-* = ON. *auð-*, as in *auð-gǫrr* easy to do. Of the adj. the normal OE. form is *íepe*, *ýpe* (also used as adv.) = OS. *ôdi* easy, OHG. *ôdi* easy, possible:—WGer. **aupjo-z*; perh. the word was orig. an *-u* stem, which would account for the existence of the form *éaþ(e* without umlaut. The OE. compar. degree of the adv. was *íeþ*, *éþ*, but there is no distinct evidence of its survival into ME.

It has been disputed whether the present word is related to OHG. *ôdi*, MHG. *ôde*, *œde*, mod.G. *öde*, ON. *auðr*, Goth. *aups* (? or *aupeis*, *aupus*), desert, uninhabited, empty. The sense offers no valid objection to the connexion of the words, as the notion of 'empty' might give rise both to that of 'desert' and to that of 'free from difficulties'.]

eccentricity (ɛksɛn'trɪsɪtɪ). [f. as prec. + -ITY.]

The state or quality of being ECCENTRIC, q.v.

1. The quality of being abnormally centred; of not being concentric; of not having the axis in the centre. †Orig. of planetary orbits: The fact of having the earth at a distance from the centre (*Obs.* exc. *Hist.*). In mod. astronomy of a circle or arc in the celestial sphere: The fact of not being concentric with the sphere.

1551 RECORDE *Cast. HERSCHEL *Outlines Astron.* iii. §141 (1858) 83 The effect of excentricity is..to increase the arc representing the angle in question on one side of the circle.

†**2.** The condition of not being centrally situated; distance from the centre. *Obs.*

(1870) II. 241 The agitation of one place of a sheet of water expands itself, in wider and wider circles..although, in proportion to its eccentricity, it is always becoming fainter.

3. Of a curve: Deviation from circular form.

1696 WHISTON *The. Earth* I. (1722) 18 All degrees of Eccentricity make Ellipses of all species. **1868** LOCKYER *Heavens* (ed. 3) 72 The orbit of Mercury is very elongated, or, in astronomical language, its excentricity is considerable.

b. as a measurable quantity.

The eccentricity of an ellipse was formerly defined as the distance between the centre and one of the foci; it is now represented as an abstract number, *e.g.* as the ratio of the focal distance of the centre to the semi-major-axis. The more modern expression, however, for the eccentricity of all conic sections is the ratio of the focal distance (of any point in the curve) to the distance from the directrix. In the case of the ellipse this is numerically identical with the ratio previously mentioned.

These phenomena, called respectively *flexibilitas cerea*, 'waxen flexibility', or catalepsy and *echopraxis*, are familiar to us from experiments in hypnotism. **1905** A. J. It is partly a question of hysteria-like mechanism .. and partly a matter of an incapacity to get away from a conceived idea, so that instead of giving an answer the question is repeated, or instead of a new action the preceding act is imitated (organic echolalias and echopraxias). **1948** *Brit. Jrnl. Psychol.* Dec. 89 Mutism .. echolalia, echopraxia, negativism .. were the most common symptoms of this group [of schizophrenics].

†**ed-**, *prefix*, OE. *ed-* = OHG. *it(a, id-* (MHG. *ite-*, *it-*, mod.G. dial. *it-*), ON. *ið-*, Goth. *id-*, again, backwards (= L. *re-*). Frequent in OE.; a few examples survived into ME.; see EDBOTE, EDGREW, EDHALDE.

-ed, *suffix*[1], the formative of the pa. pple. of wk. vbs., had in OE. the forms *-ed*, *-ad*, *-od* (*-ud*), where the vowel represents (though not with uniform consistency) the thematic suffix characteristic of the class to which the vb. belongs; the ppl. suffix proper being *-d*:—OTeut. *-do-*:—OAryan *-tó-*; cf. Gr. vbl. adjs. in *-τός*, and L. pples. in *-tus*. In some OE. vbs. the suffix is added immediately to the root-syllable, and therefore appears without preceding vowel as *-d*, or after a voiceless cons. as *-t*; e.g. in *seald* SOLD, f. *sęllan* to SELL, *boht* BOUGHT, f. *bycʒan* to BUY. In ME. the several vowelled forms of the suffix (where they were not contracted) were levelled to *-ed* (*-id*, *-yd*), and this *-ed* is in most cases still retained in writing, although the pronunc. is now normally vowelless (d), or after voiceless cons. (t), as in *robed* (rəʊbd), *hoped* (həʊpt). The full pronunc. (ɪd) regularly occurs in ordinary speech only in the endings *-ted*, *-ded*; but it is frequently required by the metre of verse, and is still often used in the public reading of the Bible and the Liturgy. A few words, such as *blessed*, *cursed*, *beloved*, which are familiar chiefly in religious use, have escaped the general tendency to contraction when used as adjs.; and the adjectival use of *learned* is distinguished by its pronunc. (ˈlɜːnɪd) from its use as simple pple. (lɜːnd). From 16th to 18th c. the suffix, when following a voiceless cons. (preceded by a cons. or a short vowel), was often written *-t*, in accordance with the pronunc., as in *jumpt*, *whipt*, *stept*. This is still practised by some writers, but is not now in general use. Where, however, a long vowel in the vb.-stem is shortened in the pple., as in *crept*, *slept*, the spelling with *-t* is universal. Some pples. have a twofold spelling, according as the vowel is shortened or not in pronunc.; e.g. *leapt* (lɛpt), and *leaped* (liːpt).

In several other classes of instances the *-ed* of early ME. has undergone subsequent contraction (in the inflected forms, however, this process had already begun in OE.): e.g. the endings *-ded*, *-ted* became *-d(d*, *-t(t*, as in *bled(d*, mod. *bled*, for OE. *bléded* (see BLEED *v.*), *set(t*, mod. *set*, for OE. *sęted* (see SET *v.*[1]); after *l*, *n*, *r*, the ending *-ded* has often become *-t*, as in *gilt*, *sent*, *girt*; and in certain cases *l*, *m*, *n* at the end of a verb-stem cause the suffix *-ed* to become *-t*, as in *spilt*, *unkempt*, *burnt*. These contractions occur only in the older words of the language, and many of the words in which they are found have parallel forms without contraction, in most cases with some difference of meaning or use. The Sc. form of *-ed* is *-it*, with which cf. such early ME. forms as *i-nempnet* named, *i-crunet* crowned, though these belong chiefly to extreme southern dialects.

2. The suffix was (chiefly in 15th, 16th, and 17th c.) added to adapted forms of L. pples., the intention being to assimilate these words in form to the native words which they resembled in function; e.g. *acquisited*, *situated*, *versed* (*sine*). Similarly, the ppl. adjs. in *-ate*, ad. L. *-ātus*, common in mod. scientific nomenclature, have usually parallel forms in *-ated*, without difference in meaning; e.g. *bipinnate(d)*, *dentate(d)*.

3. It is possible that some of the adjs. formed by the addition of *-ed* to sbs. may be examples of this suffix rather than of -ED[2]. The apparent instances of this which can be traced back to OE., however, are found to belong to the latter.

-ed, *suffix*[2], OE. *-ede* = OS. *-ôdi* (not represented elsewhere in Teut., though ON. had adjs. similarly f. sbs., with ppl. form and *i*-umlaut, as *eygðr* eyed, *hynrdr* horned):—OTeut. type *-ôdjo-*, is appended to sbs. in order to form adjs. connoting the possession or the presence of the attribute or thing expressed by the sb. The function of the suffix is thus identical with that of the Lat. ppl. suffix *-tus* as used in *caudātus* tailed, *aurītus* eared, etc.; and it is possible that the Teut. *-ôdjo-* may originally have been f. *-ôdo-* (see -ED[1]), the suffix of pa. pples. of vbs. in *-ôjan* formed upon sbs. In mod.Eng., and even in ME., the form affords no means of distinguishing between the genuine examples of this suffix and those ppl. adjs. in -ED[1] which are ultimately f. sbs. through unrecorded vbs. Examples that have come down from OE. are *ringed*:—OE. *hringede*, *hooked*:—OE. *hócede*, etc. The suffix is now added without restriction to any sb. from which it is desired to form an adj. with the sense 'possessing, provided with, characterized by' (something); e.g. in *toothed*, *booted*, *wooded*, *moneyed*, *cultured*, *diseased*, *jaundiced*, etc., and in parasynthetic derivatives, as *dark-eyed*, *seven-hilled*, *leather-aproned*, etc. In *bigoted*, *crabbed*, *dogged*, the suffix has a vaguer meaning. (Groundless objections have been made to the use of such words by writers ignorant of the history of the language: see quot.) In pronunciation this suffix follows the same rules as -ED[1].

a. By Icelandic poets of 15th c. applied to a miscellaneous handbook to Icel. poetry, containing prosodic and grammatical treatises, with quotations and prose paraphrases of myths from old poems. This work (partly written by

the Icelandic historian Snorre Sturluson *c* 1230) has since 1642 been commonly called Snorre's Edda, or the Younger or Prose Edda.

b. A collection (made *c* 1200) of ancient ON. poems on mythical and traditional subjects. The names 'Elder or Poetic Edda', 'Edda of Sæmund', were applied to this work by Biorn of Skardsá, who erroneously ascribed its compilation to the Icelandic historian Sæmund (*d.* 1133).

3. *concr.* **a.** One of the differing forms in which a literary work (or a collection of works) is published, either by the author himself, or by subsequent editors. **b.** An impression, or issue in print, of a book, pamphlet, etc.; the whole number of copies printed from the same set of types and issued at the same time.

In the case of printed works the meanings a and b are often coincident; but an 'edition' (sense a) of a classic or the like, with a corrected text and critical or illustrative matter, being in a sense an independent work, may go through several 'editions' (sense b). It is awkward to speak of, *e.g.* 'the second edition of Campbell's edition of Plato's *Theætetus*'; but existing usage affords no satisfactory substitute for this inconvenient mode of expression. To say 'the second impression' would now imply an unaltered reprint. The word is sometimes used in a narrower sense than that of the definition of b: thus a 'large paper edition' may be printed from the same type as, and issued simultaneously with, an 'edition' on small paper; but it is also usual to say '100 copies of this edition are on large paper'.

ee, *north.* and esp. *Sc.* form of EYE, q.v. for the word and its compounds, *ee-bree*, *ee-list*, etc.

'ee. Colloq. contraction for YE.

1775 SHERIDAN *St. Patr. Day* I. i, Hark'ee lads, I must have no grumbling.

-ee, *suffix*[1], used in technical terms of Eng. law, was orig. an adaptation of the *-é* of certain AF. pa. pples., which were used as sbs. The existence in legal AF. of pairs of correlative words like *apelour* APPELLOR, *apelé* APPELLEE, seems to have led in the first place to the invention of words in *-ee* parallel to those agent-nouns in *-or* which had been adapted in legal use from AF.; and subsequently the terminations *-or* and *-ee* were freely added to Eng. vb.-stems to form sbs., those in *-or* denoting the agent, and those in *-ee* the passive party, in such transactions as are the object of legislative provision. The derivatives in *-ee*, however, unlike the AF. participial sbs. after which they were modelled, have not usually a grammatically passive sense, but denote the 'indirect object' of the vbs. from which they are derived. Thus *vendee* is the person to whom a sale is made, *indorsee* the person in whose favour a draft, etc. is indorsed, *lessee* the person to whom property is let. With still greater departure from the original function of the suffix, *payee* denotes the person who is entitled to be paid, whether he be actually paid or not. In a few cases the suffix has been appended, not to a verb-stem in Eng. or AF., but to a Latin ppl. stem etymologically related to an Eng. sb., as in *legatee*, a person to whom a *legacy* has been bequeathed.

2. The use of this suffix in law terms has been freq. imitated in the formation of humorous (chiefly) nonce-words, as *iestee*, *cuttee*, *educatee*, *laughee*, *sendee*, denoting the personal object of the verbs from which they are formed.

3. In a few words, as *bargee*, *devotee*, the suffix is employed app. arbitrarily.

4. *-ee* also appears in the English spelling of certain sbs. adopted from mod. F. ppl. sbs. in *-é*, as *debauchee*, *refugee*.

-ee, *suffix*[2], of vague meaning and obscure origin. In *bootee*, *coatee*, where it has a diminutive force, it may (though not very probably) be an altered form of *-y* (in Sc. *-ie*). In other words, as *goatee*, *settee*, the analogies that may have given rise to the suffix are uncertain.

eer, obs. form of ERE, before.

-eer, *suffix*¹, is an anglicized form of the Fr. suffix *-ier* (repr. normally L. *-iārius*, and in many words replacing *-air*:—L. *-ārius*; see -ARY¹), used to form sbs. denoting persons, as in *canonnier* CANNONEER, *muletier* MULETEER; the usual sense is 'one who is concerned with', or 'one who deals in'. (Where the sb. from which the F. word was formed never became familiar in Eng. use, the original spelling *-ier* is retained, as in *bombardier*, *grenadier*). In imitation of these words (perh. in some instances rather in imitation of Sp. sbs. in *-ero*, of similar origin) the suffix is added to Eng. sbs. to form designations of persons, as *auctioneer*, *charioteer*, *mountaineer* (earlier *-er*). In many of the words so formed there is a more or less contemptuous implication, as in *crotcheteer*, *garreteer*, *pamphleteer*, *pulpiteer*, *sonneteer*.

The spelling *-eer*, replacing the older *-ier*, became frequent in new words in the early 17th century. *Mountaineer* and *waistcoateer* (a prostitute) afford early instances, and are also exceptional examples, of the use of this suffix. A few formations denote inanimate objects, as *gazetteer* (1704), *muffineer* (1806–7).

In the latter part of the 17th century gerundial and (to a less extent) participial formations on agent-nouns in *-eer* appeared, and increased in the course of the following century, as *auctioneering* (1733), *buccaneering* (1703), *electioneering* (1774), *engineering* (1720), *parliamenteering* (1711), *privateering* (1664), *volunteering* (1691). These, being formed directly on the sbs. in *-eer*, do not necessarily imply the existence of a corresponding infinitive or finite verbal form, though an early example actually appears in *mutineered* (1682). Some of these formations, e.g. *parliamenteering*, were in commoner use than the original sb.; occasionally, as in *revolutioneering*, no sb. exists, *-eering* itself being used as a suffix.

-eer, *suffix*², representing Du. *-eren*, ad. F. infinitive ending *-er*; as in *domineer* (Shakespeare), ad. Du. †*domineren*, ad. F. *dominer* to DOMINATE; *commandeer* (1881), ad. Cape Du. *commanderen*, ad. F. *commander* to COMMAND.

By a comparison of these two quantities, the *efficiency* expended on any machine, and the *duty* performed by it, an exact measure will be ascertained of its intrinsic worth. *Ibid.* 31 The received efficiency of a water wheel being represented by the pounds of water passing over it × by the fall in feet, less the height due to the velocity with which the periphery moves in its rotation. **1832** W. ego ('ɛgəʊ, 'i:gəʊ). Orig. *Metaph.* [L. *ego* I.]

1. That which is symbolized by the pronoun I; the conscious thinking subject, as opposed to the *non-ego* or object. Also *humorously*, for 'self'.

[**1789** COWPER *Letter* 6 June, To thee both Ego and all that Ego does is interesting.] **1824** GALT *Rothelan* II. 201 He plainly regarded Ego as one of the most captivating of the human race. **1829** *Edin. Rev.* L. 200 In every act of consciousness we distinguish a self or ego. **1847** LEWES *Hist. Philos.* (1867) II. 514 The Ego is essentially an Activity; consequently free. **1870** GLADSTONE *Prim. Homer* (1878) 142 The harmonious laws of his mind are everywhere visibly at work—but the ego—the mere personality—is nowhere to be traced. **1871** TYNDALL *Fragm. Sc.* (ed. 6) II. iv. 51 While the Non-ego shifts, the Ego remains the same.

2. In speech: I, the speaker. Hence **'ego** *v. trans.*, to say 'ego' when claiming an object, in response to 'quis?'. *Schoolboy slang.*

1913 C. MACKENZIE *Sinister Street* I. i. vii. 103 He was often first with the claimant 'ego', when someone shouted 'quis?' over a broken pocket-knife found. **1959** I. & P. OPIE *Lore & Lang. Schoolch.* viii. 134 In private schools a child who wishes to dispose of something.. calling out ' Quis?' and the boy or girl who first replies 'Ego' receives the object and may say (to the horror of the classicist) 'I egoed it'.

3. Self-esteem, egotism, self-importance.

Some examples are influenced by sense 4.

Torp, there's too mueh Ego in my Cosmos. **1907** *Daily Chron.* 13 Feb. 7/4 By 'exaggerated ego',..he meant a disproportionate idea of the importance of oneself and a belief that one was clothed with powers, capacities, and ability far above the normal or above those actually possessed. **1952** S. KAUFFMANN *Philanderer* (1953) vi. 97 The quarrels—which had begun between him and his wife simply because his ego could not possibly be satiated even when fortune was good—increased terribly now. **1962** J. D. SALINGER *Franny & Zooey* 166 You keep talking about *ego*. My God, it would take Christ himself to decide what's ego and what isn't.

4. *Psychol.* That part of the mind which is most conscious of self; *spec.* in the work of Freud that part which, acted upon by both the id and the super-ego (ego-ideal), mediates with the environment.

1894 *Brain* XVII. 130 By reason of the clouding over of the *ego* produced in one case by hypnotism, in another by nervous shock, an idea once installed.. will further develop and acquire sufficient force for objective realisation. **1910** H. W. CHASE (tr. Freud) in *Amer. Jrnl. Psychol.* XXI. 193 The incompatibility of the idea in question with the 'ego' of the patient was the motive of the repression. **1922** [see EGO-IDEAL]. **1927** J. RIVIERE tr. *Freud's Ego & Id* v. 83 Like the dweller in a borderland that it is, the ego tries to mediate between the world and the id, to make the id comply with the world's demands and, by means of muscular activity, to accommodate the world to the id's desires. **1943** *Psychol. Rev.* L. 454 In a semi-doze we lose all sense of our egos though we may be conscious enough of impersonal items. **1943** H. READ *Education through Art* vi. 197 The super-ego is the direct representative of the unconscious, of the id, and hence the possibility, indeed, the inevitability of a conflict with the ego, a conflict between what is perceptual and real and what is imaginative and ideal.

either ('i:ðə(r), 'aɪðə(r)), *a.* (*pron.*) and *adv.* (*conj.*). Forms: 1 æȝ-, ǽȝ-, éȝhwæðer, 1–2 æȝðer, 2 eiȝðer, (3 *Orm.* e33ðer), 3 æiðer, aieþer, 2–4 eiðer, eiþer, 3–5 aiþer, aither, ayther, (ayder, 5 eyder), 3–6 ether, (? 4–6 aþer, ather, -ir, 4 euther, ewther), 3–7 eyther, -thir, (5 eithar), 6 eather, 4– either. See also ER. [OE. *ǽȝhwæðer* (contracted *ǽȝðer*) = OHG. *eogihwedar* (MHG. *iegeweder*), f. WGer. **aiwo(n* (in OE. *á, ó*) AY, always + **gihwaparo-z* (in OE. *ȝehwæðer*: see Y- and WHETHER) each of two.

In OE. and early ME. the word appears only in its original sense 'each of two', or as adv. = 'both'; but about the beginning of 14th c. it assumed the disjunctive sense 'one or the other of two' (and the corresponding adverbial use), which properly belonged to OE. *áhwæðer, áwðer*, ME. *owþer, oþer* (see OUTHER). This disjunctive sense has so far prevailed that in mod.Eng. such expressions as *on either side* = 'on both sides' are felt to be somewhat *arch.*, and must often be avoided on account of their ambiguity. The word OUTHER became obs. in literary use in 16th c.; its mod. dial. forms (pronounced ɔ:ðə(r)) are popularly regarded as belonging to *either*. (It is not quite clear whether the forms *aþer athir* in Sc. from 14th to 16th c. should not be referred to OUTHER; cf. OE. *áðor*.)

The pronunciation ('aɪðə(r)), though not in accordance with the analogies of standard Eng., is in London somewhat more prevalent in educated speech than ('i:ðə(r)). The orthoepists of 17th c. seem to give ('ɛ:ðər, 'e:ðər); Jones 1701 has ('e:ðər) and ('aɪðər), Buchanan (1766) has ('aɪðə(r)) without alternative (see Ellis, *Early Eng. Pron.* ix, x.). Walker (1791) says that ('i:ðə(r)) and ('aɪðə(r)) are both very common, but gives the preference to the former on the ground of analogy and the authority of Garrick. Smart (1849) says that 'there is little in point of good usage to choose' between the two pronunciations, though in the body of his dictionary he, like earlier orthoepists, gives ('i:ðə(r)) without alternative.]

el, obs. form of AWL.

-el, *suffix*¹, repr. OE. *-el*, *-ela*, *-ele* (OTeut. **-ilo-*, *-ilon-*, *-ilôn-*), has in mod.Eng. usually become -LE, q.v., though the older form is retained after *v*, *th*, *ch*, *n*, as in *hovel*, *brothel*, *hatchel*, *kernel*.

OE. *-el* is added to vbl. stems to form agent-nouns, instrumental sbs., and adjs., and to sbs. to form diminutives; *-ela*, *-ele*, are chiefly used to form diminutives from sbs. and object-nouns from vbl. stems. See further under -LE.

-el, *suffix*², a. OF. *-el* (mod.F. usu. *-eau*), *-elle*, repr. L. *-ello-*, *-ella-*. This suffix is in classical Latin used to form diminutives from sbs. or adjs. in *-er* and *-ra*, as *libellus*, *libella*, from *liber* book, *libra* balance; it is also substituted for *-ulo-*, *-ula-*, to form diminutives of nouns of that termination, where the latter had lost its original diminutive force, as in *porcellus* little pig, dim. of *porculus*, f. *porc-us* pig. In Romanic it was much more widely used in the formation of diminutives. Examples in Eng. (with the spelling *-el*) are (from the masc. *-el*), *tunnel*, *bowel*, *carnel*; (from the fem. *-elle*) *chapel*, *novel*, *pimpernel*, etc.

2. It should be noted that the ending *-el* in Eng. words adapted from Fr. frequently represents other L. suffixes than *-ello-*, *-ella-*; e.g. in *jewel*, *vowel*, it stands for Fr. *-el*:—L. *-āli-* (see -AL¹); in *apparel* for Fr. *-eil*:—L. *-iculo-* (see -CULE); in *kennel* for Fr. *-il*:—L. *-īle*, as in *ovīle* sheepfold.

elasmotherium (ɪ,læzməʊ'θɪərɪəm). *Palæont.* Also elasmothere. [mod.L. (G. Fischer de Waldheim 1808, in *Mém. Soc. Imp. Nat. Moscou* II. 250), f. Gr. ἐλασμός metal plate + θηρίον beast.] A large extinct rhinoceros of the genus so named, the remains of which are found in the Pleistocene of Eurasia.

elastance (ɪ'læstəns). *Electr.* [irreg. f. ELASTIC + -ANCE.] The capacity of a dielectric for opposing an electric charge or displacement.

1885 O. HEAVISIDE in *Electrician* 9 Oct. 408/2 (*bb*). If in the final state (*b*), we unite P to Q by a second dielectric wire also of infinite capacity, we make a closed dielectric circuit which has no elastance (or elastic resistance to displacement). **1890** W. P. MAYCOCK *Pract. Electr. Notes* (ed. 2) 48 Elastance is the reciprocal (or reverse) of Permittance; the comparative elastance of a dielectric is called its elastivity. For instance, a dielectric of great permittance has little elastance and *vice versâ.* **1890** *Electrician* 14 Nov. 41 The use of the words decalescence, reluctancy, reluctivity, elastance, elastivity, permittivity, might be well deferred till they are more generally adopted. **1893** O. HEAVISIDE *Electromagn. Theory* I. ii. §31. 29 The formal relation of reluctance to reluctivity with magnetic force and induction, is the same as that .. of elastance to elastivity with electric force and displacement.

elastase (ɪ'læsteɪs, -z). [f. ELAST(IC *a.* + -ASE.] An enzyme, usu. isolated from the pancreas, which decomposes elastin. Also *Comb.,* as *elastase-inhibitor*; *elastase-inhibiting* ppl. a.

1949 BALÓ & BANGA in *Nature* 17 Sept. 491/1 (*title*) Elastase and Elastase-Inhibitor. *Ibid.,* The extract of fresh pancreas as well as that of acetone-dried pancreas powder contains a specific enzyme which we called 'elastase'. **1950** —— in *Biochem. It would not seem too unlikely to suggest that the elastase inhibitor can be an essential factor in the formation of elastic fibre. **1969** *Times* 21 Jan. 5/6 The structure of two other protein splitting enzymes, known as ox chymotrypsin and pig elastase, were also announced. **1970** *Nature* 28 Feb. 802/1 The proteolytic enzyme elastase.

elastic (ɪ'læstɪk), *a.* and *sb.* [ad. mod.L. *elasticus,* a. Gr. ἐλαστικός that drives, propulsive, impulsive, f. ἐλα- stem of ἐλαύνειν to drive.

The L. word, together with the related ELATER, occurs, app. as a novelty, in Pecquet's *Dissertatio Anatomica* (1651), where *elastica virtus* denotes the 'impulsive force' of the atmosphere, which the Torricellian experiment (1643) had shown to be the cause of the phenomena previously ascribed to 'Nature's horror of a vacuum'.]

A. *adj.*

†**1.** Pertaining to or causing the 'spontaneous' expansion of air or gases; in phrase *elastic force (virtue, faculty, power,* etc.). Now merged in 3.

1653 tr. *Pecquet's Anatomical Exper.* 122 The Spontaneous dilatation [of the air] enerveth the power of the Elastick (impulsive) faculty [Orig. **1651** *virtutis Elasticæ*] .. But the other, which is extraneous to the Air, *viz.,* from the accession of heat, will make it firm. **1656** MORE *Antid. Ath.* II. ii. (1712) 45 There is an Elastick power in the Air. **1669** W. SIMPSON *Hydrol. Chym.* 129 The air of the convex part must of necessity have a strong pressure or elastick force to return into the concave thereof.

†**2.** Of air or gas: Possessing the property of spontaneous expansion. Now merged in 3.

The ultimate particles of air were by some supposed to act like a coiled spring; hence the word came to express the characteristic property of a spring, as in the early instances of sense 3.

1681 tr. *Willis's Rem. Med. Wks.* Voc., *Elastick,* that goeth off with a force like gunpowder, or spreads forcibly forth with a jerk. **1732** ARBUTHNOT *Rules of Diet* 279 Wind is elastick and rarify'd [? air] pent up in some vessel of the body.

3. a. Of material substances, whether solid, liquid, or gaseous: That spontaneously resumes (after a longer or shorter interval) its normal bulk or shape after having been contracted, dilated, or distorted by external force. (In this sense ELASTICAL appears to be somewhat older.) Also of motions, forces, etc.: Characteristic of an elastic body. Also *elastic collision* (G. *elastisch* used in this sense, e.g. by Franck and Hertz 1913, in *Verh. d. Deut. Physik. Ges.* XV), a collision between two particles in which the total kinetic energy is conserved; *elastic constant,* a constant that expresses the reaction of a material to stress; *elastic fluids*: still often used specifically for gases (cf. 2), though liquids are now known to be perfectly elastic according to the mod. definition; *elastic hysteresis* = HYSTERESIS 2; *elastic limit*: (see quot. 1864); *elastic modulus = modulus of elasticity*; *elastic scattering,* the scattering of particles without loss of kinetic energy; *elastic strain,* a temporary deformation of a material under strain; *elastic wave,* a wave consisting of elastic deformations propagated through a medium.

'Elasticity of shape' belongs to solids only; 'elastieity of bulk' to bodies of all kinds. In the case of gases the 'normal bulk' to which they tend is indefinitely great. The strict modern use as applied to solids dates from James Bernouilli's memoir of 1694; respecting the earlier instances see note to sense 2.

4. **a.** In ecclesiastical use. A literal rendering of Gr. *πρεσβύτερος*, the title given to a certain order or class of office-bearers in the early Christian Church. The Gr. word was adopted in ecclesiastical Latin as *presbyter*, and its historical representative in Eng. is PRIEST. In certain Protestant churches, chiefly those called Presbyterian, the Eng. word *elder* (with *presbyter* as an occasional synonym) is used as the designation of a class of officers intended to correspond in function to the 'elders' of the apostolic church.

In the Presbyterian churches the term *elders* includes the clergy (for distinction called '*teaching* elders'), but in ordinary language it is restricted to the *lay* or *ruling elders*, who are chosen in each parish or congregation to act with the minister in the management of church affairs.
